## Non-Metal

As more of macOS relies on the WindowManager stack introduced with macOS Ventura, no timeline can be given for public support. However internal testing shows very early support. Much still needs to be done, but promising:

Graphics cards under non-Metal designation:

### Intel Ironlake

# Applicable Models:  
MacBookPro6, x

### Intel Sandy Bridge

# Applicable Models:  
MacBookAir4, x

MacBookPro8, x

GitHub vom OCLP den Stand zu Sonoma geschaut. Das scheint ja sehr gut voranzugehen mit unserem "Werkzeug", wenn schon Non Metal zumindest vorzeigbar ist! Mein Latitude E6410 freut sich schon !
