

Installationsfehler

Beitrag von „fabiosun“ vom 11. Juli 2023, 07:44

instead 06 you must use 08 for your 8 cores cpu

	Path	Arguments	Comment	Enabled	LoadEarly
1	OpenRuntime.efi		HFS+ Driver	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2	OpenRuntime.efi		HFS+ Driver	<input checked="" type="checkbox"/>	<input type="checkbox"/>
3	OpenPartitionDxe.efi			<input type="checkbox"/>	<input type="checkbox"/>
4	OpenUsbKbDxe.efi			<input type="checkbox"/>	<input type="checkbox"/>
5	ResetNvramEntry.efi			<input type="checkbox"/>	<input type="checkbox"/>

this is wrong, duplicated driver and missing others

	Path	Comment	Enabled
1	SSDT-EC-DESKTOP.aml	SSDT-EC-DESKTOP.aml	<input checked="" type="checkbox"/>
2	SSDT-EC-USBX-DESKTOP.aml	SSDT-EC-USBX-DESKTOP.aml	<input checked="" type="checkbox"/>

only one of this not both

May i ask if you have tried first Clover EFI produced for you?

if i do not remember wrong you have started initially a thread using Clover Bootloader
