hey [notDeviiL](#) ,

there is a quite and well known way to assure, that the efi fits, there is even a guide how to do it, cool-isn't it?

just take a look at- <https://dortania.github.io/OpenCore-Install-Guide/>

follow the guide and section for ryzen- well done,

help the others maybe helpers by putting your pc spec into your signature or profile.

2nd. advice, take a look at [HowTo: Ryzentosh](#)

thanks
