MACOS 14 SONOMA BETA

Beitrag von "fabiosun" vom 29. Juli 2023, 16:33

Zitat von Arkturus

die 0.6.9 finde ich nicht als Installer-GUI, kompilieren habe ich nicht drauf, jedenfalls klappt eas nicht trotz aktuellem Python 3.11. Keinen Fehlermeldungen, aber auch kein Ergebnis, es wikrd nichst gebaut.

https://github.com/dortania/Op...-Legacy-Patcher/pull/1077

Usegacy Metal unappies support and macus ventura - species #1008
 macOS Senoms and OpenCore Legacy Patcher Support #1076

This branch continues to be primarily for internal development, and we recommend users not install Sonoms on their devices until the fall when we hope to have a proper release of OpenCore Legacy Patcher with Sonoms support.

Latest validated builds for the isonoms-development, branch can be found below:

Nightly linit: OpenCore-Protote app (Sonoms Development)

Do not distribute direct linis to the nightly builds, instead please linit back to this pull request. As stated on SOURCE.mst, these builds should be used very carefully:
