

# MACOS 14 SONOMA BETA

## Beitrag von „fboulegue“ vom 4. August 2023, 09:51

Mmh seit der letzten Beta machen mehr und mehr Programme bei mir Probleme... so zB Skype, es öffnet sich zeigt n weißes Fenster und ist weg.

Ein reinstall hat nicht geholfen, hat ggf jemand eine Idee was ich testen könnte bzw wo ich mal gucken könnte?

Hab es mal via Terminal gestartet und sieht so aus als würde das Wifi "fixen" das ganze killen....

Code

1. /Applications/Skype.app/Contents/MacOS/Skype ; exit;
2. fboulegue@iMac-von-Fabian ~ % /Applications/Skype.app/Contents/MacOS/Skype ; exit;
