

OC DELL Latitude E6420

Beitrag von „Mo-6420“ vom 7. August 2023, 16:16

Hi gorans,

You should use macbook pro 15,2

And for USB problems

You should use these tools from the masters of OpenCore or Hackintool to generate ssdt or kexts with your own map

<https://dortania.github.io/Opencore-libs-mapping-the-manual-way>

<https://github.com/benbaker76/Hackintool/releases>

Good luck
