

OC DELL Latitude E6420

Beitrag von „gorans“ vom 15. August 2023, 10:38

Thank You [Mo-6420](#).

I tried attached kext, didn't work.

Then I tried Generic Card Reader Driver Friend! Also didn't work. 😊

PCIe													
	Debug	Vendor	Device	Sub Vendor	Sub Device	ASPM	Vendor Name	Device Name	Class	Subclass	IOReg Name	IOReg IOName	Device Path
🔍	0A:00.1	0x1217	0x8231	0x1028	0x0493	L0s	O2 Micro, Inc.	???	Mass storage controller	Mass storage co...	...ci1217,8231@0,1	pci1217,8231	PciRoot(0x0...
🔍	0A:00.0	0x1217	0x8221	0x1028	0x0493	L0s	O2 Micro, Inc.	OZ600FJ0/OZ900FJ...	Generic system peripheral	SD Host controll...	...@1C,5/PXSX@0	pci1217,8221	PciRoot(0x0...

I followed the [guide](#) and inserted what I think is correct:

▼ IOKitPersonalities	Dictionary	2 key/value pairs
> GenericCardReaderFriend	Dictionary	5 key/value pairs
▼ GenericUSBCardReaderController	Dictionary	9 key/value pairs
CFBundleIdentifier	String	science.firewolf.gcrf
IOClass	String	GenericUSBCardReaderController
IOMatchCategory	String	GenericUSBCardReaderController
IOProbeScore	Number	1000
IOProviderClass	String	IOUSBHostDevice
Physical Interconnect Location	String	Internal
> Protocol Characteristics	Dictionary	1 key/value pairs
idProduct	Number	33329
idVendor	Number	4631

Still nothing. I also tried with 33313 as idProduct but to no avail.

Guide says that reader should be visible under USB, but it's not, so I think we're missing some steps here.

As I said, it's not a big deal for me but if we can do better, why not. 😊

Best regards,

Goran
