

EFI für Gigabyte Aorus Gaming 7 & Threadripper 1950x X399

Beitrag von „fabiosun“ vom 27. August 2023, 10:10

[the ace](#) have you found in your [bios settings](#) values as 4g/Uefi/CSM?

if so:

4G on/yes

UEFI on/yes

CSM no/off

[Hecatomb](#)

kernel patches are wrong in cores numbers part

he has a 16 cores cpu (16 c/16 t) so 10 instead 20 in first patches
