

Acer Aspire E5-771G-36-SL Monterey 12.6.8

Beitrag von „apfel-baum“ vom 1. September 2023, 18:02

zu deiner efi-

es gibt 8 fehler via der opencore (oc 0.9.4) aux-tools/ocvalidate

-

```
OC Validate
NOTE: This version of ocvalidate is only compatible with OpenCore version 0.9.4!
OCS: Missing key DisableIoMapperMapping, context <Quirks>!
OCS: Missing key InstanceIdentifier, context <Boot>!
OCS: Missing key ConsoleFont, context <Output>!
OCS: Missing key GopBurstMode, context <Output>!
OCS: Missing key InitialMode, context <Output>!
OCS: Missing key PciIo, context <ProtocolOverrides>!
OCS: Missing key ResizeUsePciRbIo, context <Quirks>!
Serialisation returns 7 errors!

UEFI->Output->InitialMode is illegal (Can only be Auto, Text, or Graphics)!
CheckUefi returns 1 error!

Completed validating [REDACTED]triso-acer-EFI\EFI\OC\config.plist in 1
ms. Found 8 issues requiring attention.
```

lg 😊

edit-

keine drivers... soll das so?

möchtest du als systemsprache englisch haben?

bearbeite die efi bitte nocheinmal- > <https://dortania.github.io/OpenCore-laptop.plist/haswell.html>
