

[Sammelthread] Windows 11 DEV-Beta Erfahrungen und Diskussionen

Beitrag von „TECHNIKVERBOT“ vom 5. September 2023, 15:22

Windows 11 23H2, welches im 4. Quartal diesen Jahres erscheinen wird, wird im Übrigen als kumulatives Enablement-Package für Windows 11 22H2 verfügbar sein.

Windows 11, version 23H2 will be available as an enablement package

The upcoming Windows 11, version 23H2 shares the same servicing branch and code base as Windows 11, version 22H2. What does it mean for you? If you're running Windows 11, version 22H2, it will be a simple update to version 23H2 via a small enablement package (eP). Do you remember updating from Windows 10, version 19H2 to 20H2? Or how you've managed recent updates beginning with Windows 10, version 20H2 through 22H2? It will be that simple. Moreover, since both versions share the same source code, you don't need to worry about application or device compatibility between the versions.

Check out our [whitepaper: Windows and the shared servicing model](#) for definitions and examples of how this works!
