

# **Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma**

**Beitrag von „macinsane“ vom 7. September 2023, 18:22**

Yeah, I was thinking if some dev could come up with a solution without OCLP. It is just funny that one of the major selling points of OC was, that we never will have to alter [SIP](#). The irony. But of course I'm happy for laptop users that there is a solution after all.
