

MACOS 14 SONOMA BETA

Beitrag von „MacGrummel“ vom 12. September 2023, 22:03

Gute Güte, ist das ne lange Liste! Was wir so alles nicht gemerkt haben..

Keyboard

- Improved autocorrect accuracy makes typing even easier by leveraging a more powerful transformer-based language model
- Inline predictive text shows single- and multi-word predictions that you can add by pressing the Space bar
- Improved Dictation experience supports using your voice and keyboard together to enter and edit text

AirPods

- Adaptive Audio delivers a new listening mode that dynamically blends Active Noise Cancellation and Transparency to tailor the noise control experience based on the conditions of your environment (AirPods Pro (2nd generation) with the latest firmware)
 - Personalized Volume adjusts the volume of your media in response to your environment and listening preferences over time (AirPods Pro (2nd generation) with the latest firmware)
 - Conversation Awareness lowers your media volume and enhances the voices of the people in front of the user, all while reducing background noise (AirPods Pro (2nd generation) with the latest firmware)
 - Press to mute and unmute your microphone by pressing the AirPods stem or the Digital Crown on AirPods Max when on a call (AirPods (3rd generation), AirPods Pro (1st and 2nd generation), or AirPods Max with the latest firmware)
 - Improved AirPods automatic switching now detects Mac up to 2X faster (AirPods (2nd and 3rd generation), AirPods Pro (1st and 2nd generation), AirPods Max with the latest firmware)
