

PC bleibt bei [EB|#LOG:EXITBS:START] hängen.

Beitrag von „fabiosun“ vom 17. September 2023, 11:59

Yes also it is useful for OS greater than Big Sur

Sorry

My opinion is to check your motherboard bios option

4g on

Uefi on

Csm off

And if it hangs always there maybe you need to block your nvidia with a ssdt or similar
