I don't think so sadly. There is also no kext just for this one AWUS036ACH but this model has a different chip.

In the guid is this Bluetooth dongle mentioned: [ASUS USB-BT400 Nano](#). Will this work and how do I get it to work.

Is there any advice or experience with a USB Wifi dongle?

Can I use Airdrop when I got Wifi and Bluetooth?

BTW. Got Ventura running even though in the guide it was not recommended. Thank you so much! I love this community.
