

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „fabiosun“ vom 25. September 2023, 17:00

[nobby](#) you doesnt block the kext in Kernel/block

| Identifier | Comment | Enabled | Strategy | MinKernel | MaxKernel | Arch |
|-------------------------------|-------------------------|-------------------------------------|----------|-----------|-----------|------|
| com.apple.iokit.IO80211Family | Allow IO80211 Downgrade | <input checked="" type="checkbox"/> | Exclude | 23.0.0 | | Any |

Also, it seems kexts order is not correct

| | | | | | | |
|------------------------|--------|-------------------------------------|---------|-----------------------|-----------------------|-----|
| IO80211Family | 23.0 | <input checked="" type="checkbox"/> | Exclude | Com.apple.IOPCIFamily | Com.apple.IOPCIFamily | Any |
| IO80211FamilyAppleUSBC | 23.0.1 | <input checked="" type="checkbox"/> | Exclude | Com.apple.IOPCIFamily | Com.apple.IOPCIFamily | Any |
| IO80211FamilyAppleUSBC | 23.0.1 | <input checked="" type="checkbox"/> | Exclude | Com.apple.IOPCIFamily | Com.apple.IOPCIFamily | Any |

edit :

in my pictures the right order and the mandatory block
