

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „fabiosun“ vom 29. September 2023, 08:47

[muse 83](#) you can prepare your config.plist (kext, block, amfi , SecurebootModel and [SIP](#))

but frameworks must be patched in Sonoma OS

so you can adjust your EFI, then update to Sonoma OS, and only then you can run OCLP Sonoma version to patch Sonoma frameworks

if you use different OSX remember to apply min and max kernel to avoid problem in previous OS
