

HELP!!! MacOS plötzlich weg nach CPU Wechsel von Ryzen 3 auf Ryzen 7. Dualboot PC (WIN11Pro + MacOS Ventura 13.3+)

Beitrag von „Dr-C“ vom 25. Oktober 2023, 17:49

Efi is already there. I think it is a problem with bootloader or something. Everything is there as before. Unfortunately the old disk (cloned one) also doesn't work although nothing was changed. Only the SATA Plug was plugged out and after plugged in it doesn't work anymore.

No matter with one of the disks (cloned one or Original one) you plug in, it doesn't work anymore.
