

# Sonoma Intel I225-V

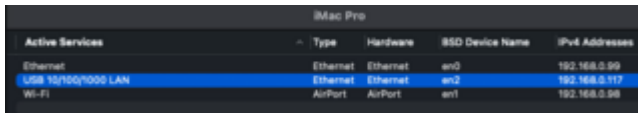

Beitrag von „al6042“ vom 29. Oktober 2023, 21:08

Cool...

wird gleich mal gecheckt... 😊

EDIT:

und funktioniert:

The screenshot shows the 'Active Services' window on an iMac Pro. It displays a table of network services with columns for Type, Hardware, BSD Device Name, and IPv4 Addresses. The 'USB 10/100/1000 LAN' service is highlighted in blue.

Active Services	Type	Hardware	BSD Device Name	IPv4 Addresses
Ethernet	Ethernet	Ethernet	en0	192.168.0.99
<b>USB 10/100/1000 LAN</b>	Ethernet	Ethernet	en2	192.168.0.117
Wi-Fi	AirPort	AirPort	en1	192.168.0.98

[cobanramo](#)

Vielen Dank für den tollen Hinweis... 😊
