

# Mac OSX 14.2.1 offiziell erschienen

Beitrag von „Maulwurf“ vom 19. Dezember 2023, 21:55

Hey [fabiosun](#) .

Got you through already?

Anything to prepare the System for?

In my Case i needed to Revert the OCLP Patcher and some Bootargs from 14.1.2 --> 14.2  
From 14.1 ---> 14.1.2 was without a Problem and without any Changes in the Config.

Tell me more Please.
