[Tony719 https://dortania.github.io/GPU...th-nvidia-and-web-drivers](https://dortania.github.io/GPU...th-nvidia-and-web-drivers), glaube da wird dir einiges klar, wenn du das liest.

Auch mit OCLP keine Chance.

macOS GPU Chart

Metal is Apple's in-house graphics API that acts as a replacement for OpenGL/OpenCL, introduced in 2015. With the release of macOS Mojave, every system without a Metal-capable GPU was dropped.
