

Complete installation of Sonoma mac OS 14 Beta - hp ZBook 15 G5 (Intel Core i7-8850H) Workstation

Beitrag von „happy2002“ vom 12. Januar 2024, 14:21

Good morning may I ask for some help.

I am installing the system, with the updated EFI file from the attachment in the previous posts.

Everything is proceeding correctly, when the system gets to 12 minutes to go it reboots, a black screen comes out with a message that I attach and it keeps rebooting the notebook always with the same message in a continuous loop.

Can you help me. Thank you.
