

ASUS ROG GL7027C , geht das?

Beitrag von „xpkiller“ vom 3. Februar 2024, 21:23

Zitat

You have to modify hecatomb Efi because his EFI is done for a 12 cores cpu

So you have to adjust kernel patches values from 0c to 06

I now that, but I don't know how I can do this, I have no Mac!
