

NVMe Probleme in Big Sur

Beitrag von „max.b1963“ vom 13. Februar 2024, 03:26

Without having the correct firmware in place disk utility will not be able to recognize your NVMe drive. Please refer to the following link.

<https://eclecticlight.co/2021/...r-mac-be-using-version-6/>

Firmware updates can only be concluded with your original Apple SSD drive in place. Start with High Sierra. There is a lot of information to be found on the internet. Good luck.
