

MacOS Ventura Blackscreen

Beitrag von „Fyynnn“ vom 13. Februar 2024, 14:00

[fabiosun](#)

UEFI On

CSM Off

4G On

ReziseBar on or off?

Ventura isnt working, its the try to install it again on a new SSD. My old SSD was to small an I had the problem with the Wlan an Bluetooth, so i gave up. Now I will buy a Broadcom Card. Also I have a bigger SSD now, to try it again.

gene-x

Hat leider nix gebracht. Immernoch das selbe Problem.
