Hello, I have a problem I did everything as said on opencore but at the time of installation it restarts and the most has the usb key nis to the ssd

if anyone can help me please

Here is my config:

ryzen 9 5900x

asus b550 xe

32 gb 3600 mhz

rx 6900xt

psu seasonic 1000 watt

2 nvme samsung 990 pro 2to

one nvme for windows and the other will be dedicated for mac os

so I would like to have someone who could help me
