

macOS 15 Sequoia Beta im Test

Beitrag von „fabiosun“ vom 24. Juni 2024, 08:19

[Phoenix85](#)

1) you have to download AMD beta Kernel Patches 2 patches are only fo Sequoia

2) see above

3) Max kernel value

Where you see 23.99.99 you have to set to 24.99.99 (not for old patches 1/2 as above because they are new)

Attached my config.plist

Check kext section (use latest Lilu found in github / action)and Kernel patches (i use also OCLP so you have to adapt for your needs)
