

Gelöst: Dell XPS (2017) KabyLake + Sonoma + Probleme mit Iris 640 und DVMT

Beitrag von „Bob-Schmu“ vom 3. Juli 2024, 17:12

So wie es aussieht, hast du wohl die Sektion übersprungen.

AAPLig-platform-id	Type	Comment
00001859	Laptop	Recommended for HD 615, HD 620, HD 630, HD 640 and HD 650
00001659	Laptop	Alternative value to 00001859 if you have acceleration issues, and recommended for all HD and UHD 620 NUCs
0000C087	Laptop	Recommended for Amber Lake's UHD 617 and Kaby Lake-R's UHD 620
00001E59	NUC	Recommended for HD 615
00001859	NUC	Recommended for HD 630
02002659	NUC	Recommended for HD 640/650

Kaby Lake 7XXX

Highest Supported OS: Current/Ventura (13)

Initial Supported OS: Sierra (10.12.6)

Most GPUs are supported here, excluding the HD 610 present in the Pentium G4500.

Supported GPUs:

- HD 615
