

# Interest in Ozmosis

**Beitrag von „hyux1“ vom 9. Juli 2024, 23:34**

Thank you for not immediately opposing this plan. I've already thought about taking the time to better understand the OpenCore code. And then try to integrate this code into the Ozmosis code, as was done with Clover. If that works, a good alternative to opencore would be available and Ozmosis would be alive again.

What I don't like are people who ask questions, then don't answer them anymore like [Bob-Schmu](#)

[pupokass](#) supports the topic and has already created a post about it in the Insanelymac forum.
