

macOS 15 Sequoia Beta im Test

Beitrag von „schmalen“ vom 11. Juli 2024, 12:14

[Arkturus](#) Das Patchen hat nicht funktioniert, nun kommt ne Meldung:

- Starting Patch Process
- Determining Required Patch set for Darwin 24

The following patches will be applied:

- Graphics: Intel Haswell
- Networking: Modern Wireless
- Verifying whether Root Patching possible
- Patcher is capable of patching
- Local PatcherSupportPkg resources available, mounting...
- Mounted Universal-Binaries.dmg
- Running sanity checks before patching
- Running patches for iMac19,1
- Running Preflight Checks before patching
- Found SkylightPlugins folder, removing old plugins
- Cleaning Auxiliary Kernel Collection

An internal error occurred while running the Root Patcher:
