

Ventura Ryzen 5: L Ä U F T !

Beitrag von „fabiosun“ vom 28. Juli 2024, 18:54

[Zitat von wu ming](#)

[fabiosun](#) No updating - a new installer from the scratch on a new fresh ssd

Try to disable both visual kernel patches in your Kernel patches section (they both are not useful for you and for some installations from scratch they gave problems)

Also in bootmenu clear NVRAM after you apply this advice (if you will do i mean)
