

[AM5] Asus ROG x670E Hero - 7950x

Beitrag von „fabiosun“ vom 31. Juli 2024, 15:28

[EFI-ASUS x670E HERO Bios2124-fabiosun.zip](#)

This is my latest OpenCore 1.0 EFI for macOS Ventura/Sonoma/Sequoia

I use a Fenvi WIFI with OCLP patches, so you have to check kexts and block i use if you use intel WIFI and delete them (adding right kexts for your Intel WIFI)

I am using latest 2124 ASUS Hero firmware patched via ACPI patches in config.plist ACPI patches section (Thanks @CorpGhost for the ACPI patches)
