

# Ventura Ryzen 5: L Ä U F T !

Beitrag von „fabiosun“ vom 31. Juli 2024, 17:02

ciao wu ming,

[Zitat von wu ming](#)

The whole world has problems with the I211-At I

some italian dev has modified a kext and many people is happy with it and AMD i211 card (in the past my pc had 2 I211 and with that kext it worked well with new OSes

I will post it if you cant find it if you like to try

[Zitat von wu ming](#)

'Above 4G Decoding'

if you put this on and it enables also resizebar in your [bios settings](#) you have to change resize bar option in config.plist from -1 to 0 and see if the system works without ncpi=0x2000

[Zitat von wu ming](#)

has there ever been a "Hackintosh Stammtisch" in Italy? :-))

i dont know 😊

EDIT:

for i211 informations:
