

Sehr schlechte OpenCL Performance

Beitrag von „fabiosun“ vom 9. August 2024, 14:51

I do not follow dortania guide for this (i use and like their product like OCLP but not their guide for AMD)

Default patch used is algreys one

it is much slower than Shanees one

i would suggest to try it and if you do not have additional problem i would use Shanees patch

I would also check better Device properties and use it together with whatevergreen kext (disable NootRX kext)

you have to use ioregistry explore app and search for GFX0, you will find your path and you have to change in my SSDT here

```
External (_SB_.PCI0, DeviceObj)
External (_SB_.PCI0.GPP0, DeviceObj)
External (_SB_.PCI0.GPP0.SWUS, DeviceObj)
External (_SB_.PCI0.GPP0.SWUS.SWDS, DeviceObj)
External (_SB_.PCI0.GPP0.SWUS.SWDS.VGA_, DeviceObj)

Scope (\_SB_.PCI0)
{
    Scope (GPP0)
    {
        Scope (SWUS)
        {
            Scope (SWDS)
            {
                Scope (VGA_)
```
