

Neu Installation auf ThinkCentre M720Q mit wlan Problem

Beitrag von „xpkiller“ vom 21. August 2024, 19:30

Nein natürlich gebe ich nicht auf, ich hatte nur noch nicht die Zeit (Lust) mich weiter darum zu kümmern. 🤔

Ich habe mir jetzt erst mal einen USB Bootstick angelegt, mit dem ich mein Sonoma auf diesen Rechner mit starte. Ich möchte mir mein laufendes System nicht mit Sonoma nicht schrotten. Da Sequoia ja auf einer eigenen Partition gespeichert ist kann ich ja mit dem Bootstick experimentieren. Ich habe erst mal wie du gesagt hast die wlan Kexte rausgenommen. Das -v habe ich auch wieder eingefügt, (wie dumm von mir, natürlich kann man damit verfolgen, wo es stehen bleibt 🤖)

Ich habe mal ein Screen shoot gemacht, wo es stehen bleibt und nicht mehr weiter läuft.

```
