

Hackintosh nicht funktionell, startet nicht

Beitrag von „griven“ vom 25. August 2024, 14:47

Should be the one provided by me in Post #28 [fabiosun](#). He stated that he reached the language Picker/User configuration screen and than the System froze. I Guess Lan may be the culprit since the board indeed has two 2.5 Gbit Intel Lan Ports which may not be covered/well covered bei IntelMausi...

I replaced IntelMausi.kext with the one provided by you: [EFI.zip](#) [AlexanderK21](#) probier mal damit 😊

Thank you [fabiosun](#) for your effort 😊
