

# Hackintosh nicht funktionell, startet nicht

Beitrag von „griven“ vom 25. August 2024, 15:04

Well I guess that's something to change immediately since [AlexanderK21](#) is somewhat inexperienced and has difficulties to understand English as he wrote a few posts above. I guess the less hassle the better in this case since I highly doubt that he will be able to manually set any speeds and stuff like that 😊

[AlexanderK21](#) anbei nochmal mit dem AppleIGC.kext für LAN: [EFI.zip](#)
