

Hackintosh 10.15 to Big Sur

Beitrag von „Adiyahav“ vom 19. September 2024, 09:42

Hi guys ,

I'm new here and I would appreciate your assistance.

I have PC with Hackintosh 10.15 Catalina installed.

Boot loader is clover 4458.

Before I installed 10.15 version I has 10.14 .

I just download from the App Store version 10.15 and installed so simple.

The question is :

Can I do the same with Big Sur version?
