

Hackintosh nicht funktionell, startet nicht

Beitrag von „fabiosun“ vom 21. September 2024, 15:27

[Zitat von fabiosun](#)

this is the config i did for you

new AMD Kernel patches and secure boot model disabled

use exactly this config i did with all modifies i think you need 😊

if you do not solve in this way i will back this evening

EDIT i did an error but something it is difficult to me to follow well

However in SONOMA and in Sequoia to install no Visual kernel patched and secureboot Disabled

Applealc doesnt work (for now in sequoia)
