

# Ryzen 9950x

Beitrag von „fabiosun“ vom 9. Oktober 2024, 15:41

[Zitat von derpuma](#)

FYI, I have the new 9950X running in my UNRAID Server and virtualising macOS Sonoma with KVM.

No problems so far. Upgraded from an 5950XT without any problems.

thank you derpuma, i have bought some days after my request and happy with it in baremetal hackintosh as you see in my signature

About 6950xt USB, i am re trying by now with the next and i will post my results
