

OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „karacho“ vom 9. Oktober 2024, 20:21

[Zitat von fabiosun](#)

Before this fix i have added by myself new OC Validate and other new opencore stuff in OCAT database..but error was there the same

On my System too.

New version Solved this validation problem and saving config plist does not delete anymore Unload tab

Right now i'm on Linux working and can't validate. Will test later.
