

Mein neuer Hackintosh - Asus ProArt Z790 Creator WiFi

Beitrag von „al6042“ vom 1. November 2024, 13:41

Ich habe ja an der 6900 XT auch diesen USB-Schnuppel dran, aber damit auch keinen Stress. Könnte man nicht über die config.plist oder einer entsprechenden SSDT die PCI-Definitionen deaktivieren?

Card	Type	Driver Installed	Slot
Alder Lake-S PCI Serial IO I2C Controller #2	Serial bus controller	No	Internal@0,11,0
Alder Lake-S PCI Shared SRAM	RAM memory	No	Internal@0,20,0
