

Sequoia und Bluetooth

Beitrag von „tackerJim“ vom 3. November 2024, 18:13

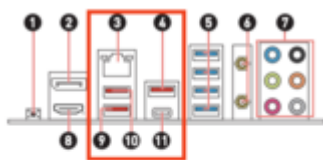

Here my SMBios.

What i can say. If i turn on OnBoard Bluetooth my Hackintosh did´t shut down. (goes of and on)

If OnBoard Bluetooth is turned of in Bios it Works.

Other Problem. If i use USB-Ports with USB-Stick (mark in the picture: Port 4, 9,10, (11 i don´t know)) my system also did´t shut down. (goes of and on)

Back Panel Connectors

Item	Description
1	Flash BIOS button - Please refer to page 53 for details about updating BIOS with Flash BIOS button.
2	DisplayPort
3	2.5 Gbps LAN jack
4	USB 3.2 Gen 2 10Gbps Type-A port (From CPU)
5	USB 3.2 Gen 1 10Gbps Type-A ports (From Hub-1074)
6	Wi-Fi antenna connectors
7	Audio jacks
8	SCART™ port HDMI
9	USB 3.2 Gen 2 10Gbps Type-A port (From CPU) * Flash BIOS Port
10	USB 3.2 Gen 2 10Gbps Type-A port (From CPU)
11	USB 3.2 Gen 2x2 20Gbps Type-C port (From BeS3 chipset)

If i turned of OnBoard Bluetooth and didn´t USE the Ports with USB-Stick, it works...
