

Mouny App problem

Beitrag von „karahezorbey“ vom 11. November 2024, 06:51

I am using macOS Sequoia 15.1. After installing the Mouny application with terminal commands, disk partitions with Windows 11 installed are not mounted as writable. I can mount disks with Windows 10 installed on another computer as writable using the Mouny application. But I have Big Sur installed on that computer.

Does anyone have a solution suggestion for this?
