

# Matebook X Installation USB 3 Kompatibilität und mehr ... ??

Beitrag von „waldfee123“ vom 15. November 2024, 15:06

Hab es jetzt installiert bekommen ... Aber schon ab Mitte der Installation finf plötzlich das Bild durchgehend das blinken an ... Ich kann ganz normal steuern und schreiben , nur das Bild blinkt während der Installation und auch danach ... War aber erst kurz bevor das Install Menü kam ...

Was kann ich dagegen tun ? Das wäre erstmal das schlimmste To do ...

Hier meckert er auch was an ... Danach blinkt es ...
