

# Installation von Sequoia gemeistert - aber wie kann ich die EFI etc. ausmisten ? ... und wie Ortungsdienste mit Heliport bekommen ?

Beitrag von „Arkturus“ vom 2. Dezember 2024, 11:11

auf AirportItlwm.kext warten

## Does it support Location Services

Supported on [AirportItlwm.kext](#).

[Itlwm.kext](#) reports the Wi-Fi card as an Ethernet NIC to macOS, rather than Wi-Fi. This means that Find My does not work, since it relies on Wi-Fi data (like what networks are around you). This likely means that other location services don't work as well.
