If you want to use efi Clover from the same site:

<https://olarila.com/>

First it works too and %

Secondly, don't update kexts

If you want upgrade clover and don't touch kexts

Add kexts of cardSD and Wifi too

With alcid=11 to fix sound

And you have a full pc macbook

Have a good day and a new sweet beginning 2025

Great thanks to all masters of hackintosh on the world
