

Probleme mit Aquantia 10GbE Adapter und Gigabyte Z370 onboard Ethernet Adapter unter Sonoma

Beitrag von „PGC“ vom 6. Januar 2025, 21:16

UPDATE

[fabiosun](#) I have some very good news 😊

Both of my network adapters are working with the patches that you included in my config.plist. What a joy!

I had to disable VT-d in the BIOS and after a NVRAM reset and a reboot, both cards work perfectly. Thank you soo much for your help.

Of course I have to do some more tests but so far, everything looks fine.
