

Hello, if someone could help me install macOS Big Sur or any version, I would really appreciate it.

Beitrag von „APDO“ vom 10. Januar 2025, 11:09

My components are:

i7 10700

Radeon RX 5700 XT 8G OC Edition

ASUS TUF Gaming Z490 Plus WiFi

ADATA Falcon 512GB 3D NAND PCIe Gen3x4 NVMe

I recently tried to do it on my own, but it hasn't worked when loading the USB.

I get this error (in the image), and I've tried everything I can, but I'm new to this. I would greatly appreciate it if someone could help me.
