Tutorial: El Capitan - AMD - Legacy Installation

Beitrag von „oqx“ vom 22. Januar 2025, 23:06

Hey, my system is:

AMD Athlon II X4 640

AMD Radeon HD 7950

Gigabyte GA-880GM-UD2H (rev1.4)

I am trying to run El Capitan using OpenCore, but the system reboots after the picker. Please help.
