Tutorial: El Capitan - AMD - Legacy Installation

Beitrag von „oqx“ vom 26. Januar 2025, 00:55

Hey,

My specs are:

AMD Athlon II X4 640

Gigabyte GA-880GM-UD2H(rev1.4)

HD 7950

what guide should I follow for these specs??

I tried Enoch and got stuck on

boot0: GPT

boot0: done

I tried OpenCore and it reboots after the picker without any verbose
